

# Which domains of power do elites combine?

280,761 elites whose two coded sectors fall in two different domains

Association between domains

The six crossings, ranked

Expected counts come from a quasi-independence model refitted on the four domains, so the scores are net of how many elites each domain holds.  
 Intervals are 95% percentile bootstrap, 2,000 draws. Nobility, Kinship and Sport & Games are left unclassified: they name a mode of transmission or a form of celebrity, not a domain of power.
