Bars are 95% bootstrap intervals. Political with ideational is the crossing on which countries barely differ, spanning 0.19 from end to end; money with coercion spans 1.97. Country is the cross-verified citizenship of the source, projected onto modern states, so the label is anachronistic for anyone born before the state existed. Coverage is encyclopaedic coverage: how many elites a country contributes says as much about which Wikipedia editions write about it as about the country.
