

Positions hold at the edges and churn in the middle

Which block each sector sits in, era by era

Top: blocks are refitted inside each era and matched to the pooled solution by overlap, so a colour means the same position throughout. Academia and both culture sectors never leave their block and kinship never leaves the military one; sport and the business sectors move repeatedly. The 1900-2020 cut yields three blocks, not four. Bottom: mean association within and between blocks. Within beats between in every era, by 1.64 pooled and by as little as 0.24 in 1600-1799, which is what makes these blocks worth drawing; it is not uniform, and the business block's own diagonal turns negative in three eras.
